For example, if your subject's skin is yellowish, you might want to make adjustments to the whole photo to get rid of the yellow cast. There are three main settings to control white balance in Photoshop Elements. They are as follows: Color temperature: Color temperature refers to the color of the light that strikes your subjects. It is usually measured in Kelvin. This is the temperature of a black body. Any color you are seeing in your photos is reflected light, and the color is described by the temperature of the light source. Color temperature is measured in Kelvin. Reaching for the Stars and Other Hopes I found myself sitting alone on the House River Parkway at night, staring out at the lights of downtown Milwaukee in the distance. The Milwaukee sky may not be the most dramatic view in the world, but it's peaceful in its way. Like a hot summer night in the city with the first hint of fall in the air, the moon hung high, shedding golden light across the pines and the water and the city. It was one of those nights I didn't have anyone I wanted to see or do anything with, but still, I didn't want to go home. So I stayed up late, alone, among the stars. I started to think about my life, the life I was living, the life I wanted to live. I thought about the massive upheaval I saw coming for a lot of people, people like my grandmother and her generation, and how they felt they had no choice. They had to go along with what was happening, whether it was out of genuine enthusiasm, a desire to see the brighter side of life, or because of their simple desire not to get trampled. I think about all the people I know who work in the restaurant business, all the people I met at Z's, and all the people who work in other lower-paying and less glamorous jobs. There's a little more chaos in your life than you'd think, but people around you show up. I hope they keep showing up. I hope no one gets left behind. I hope there's someone there who will lift you up when you are down, and remind you that hope is the thing with feathers. And I hope a lot of people find peace in spite of everything. I don't know if that's possible, but I keep hoping. Post navigation 3 thoughts on "Reaching for the Stars and Other Hopes" Hm. You're preaching to the converted, Chris. I was reading Catherine, about the same age as you and very much in the same situation. The book, and her blog, are a guide to how to organize and carry on, even in times when a direct line to government is a one-way street, if you know how to navigate those waters. The blogger I think of most, by far, is Jennifer Dawson. She does a daily lesson
