Structured Query Language (SQL) is the standard database query language used for querying databases. It is an extension of

Structured COlumnar (SQL) and is used as a language for retrieving, manipulating and inserting data into a database. Although ObjectARX was designed as an extension of AutoCAD Serial Key, it is not dependent on AutoCAD and can be used independently. For example, the technology is used in Autodesk's drawing applications – Inventor and Revit. History AutoCAD was initially written in Pascal, and originally known as AutoPAS. AutoPAS was first released in 1989 as a 32-bit version of AutoCAD. The last version of AutoPAS was AutoPAS for AutoCAD 3.0, released in 1997. AutoPAS for AutoCAD 2.0, released in 1996, was a Microsoft Visual Basic 5 application that could be run either as a standalone application or as a component of AutoCAD 2.0 or AutoCAD 2.5. AutoPAS for AutoCAD 4.0, released in 1999, was written in Java and could be run either as a standalone application or as a component of AutoCAD 4.0. AutoPAS for AutoCAD 1.0, released in 1991, was a 32-bit version of AutoCAD that did not support layer drawings, only objects. It supported all of AutoCAD 1.0's object-oriented features, such as views, layers, dimensions, and intelligent guides. AutoPAS for AutoCAD 1.5, released in 1993, was a 32-bit version of AutoCAD with the same features as AutoPAS for AutoCAD 1.0. AutoPAS for AutoCAD 2.0, released in 1996, was a 32-bit version of AutoCAD and included such features as multilayer drawing views, linked views, and annotation layers. AutoCAD was originally written in Borland Pascal, and later written in C++. AutoPAS for AutoCAD 1.0 was a 32-bit version of AutoCAD that only supported 32-bit versions of AutoCAD. The last version of AutoPAS for AutoCAD 1.0 was released in 1997. AutoPAS for AutoCAD 2.0, released in 1996, was a 32-bit version of AutoCAD that could be run either as a a1d647c40b
