Flightradar24 Pro is a free flight tracking app that shows your real-time location and information about.Scapulosciatite Scapulosciatite is a phosphate mineral with formula (Na,Ca)2P2O7(SO4)4F1–4, and is a member of the apatite group of the pyrophosphate minerals. It has an orthorhombic crystal system and a Mohs hardness of 3.5. Scapulosciatite was first described in 1995 from deposits in Serbia, and named for characteristic X-ray diffraction patterns. It is related to the minerals carlbergite, colemanite, hewettite, jeanite, monoclinic apatite, natrolite, tennantite, and wadgesite. References Category:Phosphate minerals Category:Apatite group Category:Monoclinic mineralsQ: Closing a shutdown loop I'm trying to close a blocking loop which is waiting for an event to finish, but using a function handle instead of an.event value. That is, I want to: close this event loop with an interrupt_main, just like this: But the behavior is different! The expected behavior is for the program to block on the function handle until an event is received.
