PZenDump Crack For Windows

PZenDump Product Key is a straightforward application designed for advanced PC users looking to easily dump the target process memory. It shows a list with all currently running processes and gives you the possibility to select one or more of them to dump. The program comes as a GUI with multi-thread support, since most process dumpers are available in the command-line interface. Simple installation and interface Setting it up takes minimal time and effort, thanks to the fact that the wizard has familiar steps. As for the GUI, PZenDump has a simple window that displays all active processes at startup automatically, enabling you to study their names, icons, process IDs, sizes and domains, along with the number of total items discovered. The list can be refreshed if any modifications were made in the meantime. After selecting one or more processes, you can ask the utility to start dumping their information. Analyze and dump processes to file This action brings up another small window that shows a progress bar for the currently processed item along with its name and ID, as well as a list with all targets. It's possible to pause and resume the job, or to abort it if it takes too long or if you change your mind. A notification message is shown and an audio alert is played on task completion. The new files are automatically created in the program's installed directory, more specifically in the "dumps" folder. They have the.dmp format. Evaluation and conclusion It worked well in our tests, without freezing, crashing or indicating errors. Its impact on the computer's performance was minimal, as it used low CPU and memory. All in all, PZenDump offers a speedy solution for dumping the information of active processes, and it can be handled by anyone with ease.... 0.59 MB PZenDump.Toolbar.Install.Remove.XP.R2.

PZenDump is a straightforward application designed for advanced PC users looking to easily dump the target process memory.
