Simple installation and typical interface The setup process does not pose any kind of issues, and it does not take very long. After finalizing it, you come face to face with a pretty simple and quite familiar GUI, as long as you have used another productivity suite in the past. Nevertheless, it is quite well-organized and it allows all types of users to get around it without encountering issues, and packs comprehensive Help contents. Tools one can take advantage of As stated above, this office suite comes bundled with three components, namely "Show" which helps you create presentations, "Calc" developed for complex calculations and "Write" so that you can easily create text documents. In addition to that, you should know that a file manager is also included, which lets you easily upload items to a cloud storage solution provided by the developer. It allows you to use up to 1GB of space with no charge, yet you are required to create an account. All aforementioned components are compatible with Microsoft Office documents, while it is also possible to save your projects directly as PDFs and send them to the printer. Options you tweak when creating slideshows Presentations can also be saved as JPG or PNG pictures, e-mailed as an attachment directly from the main window and exported to your iPod with the help of a wizard. Aside from that, you can use a slide sorter, edit the master text style, add headers and footers, and insert items from a long list of built-in clip arts, from the hard drive (e.g. GIF, JPG, BMP, WMF, EMF, PNG, TIF, PICT etc.) or your Flickr account. Movies, audio tracks, text boxes and tables can also be added to projects, while you can also customize the slide design, layout and background, animations and transitions. Write text bodies and manage finances When it comes to spreadsheets, they can be previewed in a new tab in your default web browser, while you can also e-mail them as attachments directly from the main window. It is possible to use charts, symbols, worksheets and comments,
