VCF VCard Creator Software Activation Code With Keygen Free Download

Ease of Use Tool: Create Great Product Description: VCF vCard Creator Software is a lightweight software application whose purpose is to help you design business cards. Intuitive layout It sports a clean and simple interface that allows you to perform most of the operations with minimal effort. You are welcomed to provide general information about your card, insert photos, and embed custom notes. Creating a brand new business card VCF vCard Creator Software comes packed with several built-in parameters for helping you enter details about personal information (e.g. name, company, email address, title, website, birthday), home address data (e.g. home city, country, region, ZIP), work address (e.g. city, address, ZIP), as well as contact information (e.g. home and work fax, pager). Once you have filled in the necessary fields for completing your business profile, you are allowed to upload an image from your computer (JPG or BMP file format) and enter a custom message. You can type in the text or upload it from other third-party tools. Last but not least, you can save the generated business card to VCF file format. During our testing we have noticed that VCF vCard Creator Software carries out a task quickly and without errors. It is quite friendly with system resources, so the overall performance of the computer is not affected.

Bottom line All in all, VCF vCard Creator Software combines ease of use with several handy features for helping you generate business cards and personalize them with images and custom notes. The intuitive layout makes it an ideal application for rookies and professionals alike.
