WinDateChanger Product Key is a free and open source application that allows you to automatically change the last modified date and time of files with selected attributes using a 3-step wizard interface. The purpose of the program is to provide a quick and easy way to fix issues such as incorrect creation date or time, incorrect last modification date and time, or mixed dates and times used for a file (as could occur with a FTP transfer). The application relies on the FindFirstChangeNotification and FindNextChangeNotification functions of the File System provider. When these two events occur, the modification time of a file is checked to see if it has been modified since the last time the application was used. I love it all. I've just been doing it as well as I could to the best of my abilities. It's always been a partnership between the artist and the subject, and for the most part the subject has been the most important part and what I put the most time and effort into, but I think that more and more the artist has become the most important part as well. Nrama: You've done some incredible photorealistic renders with films like Pacific Rim, Pacific Rim: Uprising, and Guardians of the Galaxy. Are those more of the bigger titles that you take off the grind? The more digital, photo-realistic work is more obvious, but do you also do a lot of work like that for film? Greg Capullo: Let's just say you're going to have to remain on the lookout for the next Guardians of the Galaxy cartoon episode! Just kidding. Yeah, I have to work on both, but as of now I'm doing more graphic novel or film book interior work. Although I do do a lot of work for film as well. I've done a lot of concept art for Pacific Rim, and I've done a lot of concept art for Pacific Rim: Uprising. Yeah, I try and help out wherever I can with anything I can. I'd love to do more, just because I think it's such a joy to work with people on such a collaborative basis and just feed off of each other's energy. Nrama: I haven't even talked to you about your comic work or even your inking for Brian Azzarello in the 60 days we've been doing this interview, but I'm curious if you think of the techniques you've learned in creating art for film or in designing toys in terms of making a comic book page look better. Greg Capullo: For sure, because you learn about anatomy, right? You learn about how people move, and everything else. So, yeah, absolutely. I'm not good at all, but I'm getting better at it. I think that's what I need to be doing more, doing more film work
