Q: How do you set up a Date range in the Sheet Connection Pane In Charts, there is a 'Date Range' option under the 'Sheet Connection' panel. How can we achieve the same thing in Sheets? A: If you go to "Data" in the menu bar, then click "Time" on the left panel, you will get a range chooser in the right panel. You can then drag to select a range, and use the arrows to select new series: If you hit "refresh" you get a new table (not a chart) - so you can select what you want to paste. I don't know what range should be selected, as you say "now"

The present invention generally relates to semiconductor device manufacturing, and more particularly, to a method of depositing a metal layer on a silicon layer and to a dual damascene structure for forming the metal layer on the silicon layer. In semiconductor device manufacturing processes, copper is widely used as a conductive metal material for forming a circuit pattern on a semiconductor substrate. For example, copper is used for interconnecting elements on a substrate. Also, it may be used for forming a sub-layer of a multi-layer circuit structure of a semiconductor device. Currently, damascene processes are widely used for forming a circuit pattern on a substrate with a copper interconnect. However, to form the damascene circuit pattern with copper, etching processes are needed to remove insulating materials which are used to form a recess by forming a trench. However, the etching processes are not suitable for forming the damascene circuit pattern on a silicon layer. Consequently, prior art dual damascene processes use a silicon nitride layer and a plasma etching process to form a recess in a silicon layer. However, using a silicon nitride layer may cause problems with erosion and the plasma etching process may have a high power requirement. Therefore, a dam
