Flym YT-2 Get In Touch About Us Contact Tutorial Problem Solving Tutorial Problem Solving "An alternative to 3D, too. 3D, which is most commonly associated with video games or 3D movies, is a perception of dimension. Since 2010, the latest Nintendo DS, Nintendo DSi, Nintendo 3DS, and Nintendo 3DS XL (Nintendo DS Mini) use a 3D display to produce a 3D effect on the screen. 3D technology is also used in Nintendo DSi cameras and 3DS mobile phones, the latter with the help of the 3D Screen Camera Lens. A process of producing an image that produces the illusion of depth is called stereoscopy. Stereoscopy is achieved in most 3D movies and video games by using two slightly different frames of the same image, each one
