Artist's description: A landscape in the Brooklyn Bridge Park. Somehow serene and picturesque. A woman's subtle, delicate hand is laid on the treetops, yet the greenness is so familiar that one is not really upset by the painting. Artist's description: A landscape in the Brooklyn Bridge Park. Somehow serene and picturesque. A woman's subtle, delicate hand is laid on the treetops, yet the greenness is so familiar that one is not really upset by the painting. Endoscopic sinus surgery: Are there differences in the outcomes according to age? The purpose of this study was to determine the differences in the success of endoscopic sinus surgery (ESS) among different age groups. A retrospective review of patients who underwent ESS was performed. The cohort included 107 patients (57 women, 50 men) with a mean age of 48 years (range, 18-72 years) with a follow-up period of 18 months (range, 12-24 months). All patients were divided into 5 age groups. There were 61 patients in the 20-39 years group (51.4%), 35 patients in the 40-59 years group (29.6%), 7 patients in the 60-69
