MKV Buddy [Win/Mac] (April-2022)

MKV is a container format developed by the Matroska organization and released in May 2005. It is typically used in conjunction with MP4 and AVI media formats. The container format uses an XML specification to define the structure of media files and provides general handling of tracks containing video, audio, subtitles or metadata. Compared to the simpler MP4 container format, it enables more advanced possibilities for multimedia file handling. MKV stands for Matroska Video and is an open industry standard which is being used by many media formats including MKV, AVI, WAV, and RAR.
