How to Convert Object to Binary Data without loop in VB.NET? Here example in C#, Thanks all. using System.IO; ... object obj = ("not null value"); MemoryStream ms = new MemoryStream(); BinaryWriter writer = new BinaryWriter(ms); writer.Write((byte[]) obj); byte[] toBinary = ms.ToArray(); A: You have two questions to deal with: 1) Convert the object to a byte array: It sounds like you are trying to convert a string to a byte array. That's easy. Use: String.Join() to convert a string to a byte array. byte[] toBinary = obj.ToArray() 2) Convert the byte array to a binary stream Without knowing more about what you're trying to do, it's hard to say if you need this. But it's possible this could be useful. If you need to save the stream to file, e.g. a *.txt file, you would use: File.WriteAllBytes() to write the byte array to a file. File.WriteAllText() to write the byte array to a file with the *.txt extension. Putting it together, you could use: File.WriteAllBytes(@"c:\temp\testfile.txt", obj.ToArray()) to write the object to a file. Widow, 1 teenage son of murder victim sue city for \$1 million Share this story »Play VideoThe Burroughs family has been suffering since their son Jesse's murder nearly two years ago, and, at least until a new class of action attorneys get to work, they will continue to suffer
