Colorado Daily Camera The Colorado Daily Camera is a newspaper published seven days a week in Colorado Springs, Colorado. It has been published since 1976, when it replaced the Colorado Springs Gazette-News, which was first published in 1865. In 2016, the Daily Camera was voted the "Best Newspaper in Colorado" by the Society

of Professional Journalists. History The daily was first published as the Colorado Springs Gazette, as was common practice at the time for the evening editions of the state's major papers. The original publisher was the Mountain States News Association (MSNA), an association of newspapers that were based in Colorado, which allowed the group to enforce a code of ethics and more importantly served as a marketing and lobbying organization for the newspapers in the group. MSNA was founded in 1875 by the newspaper publishers from Colorado Springs, Colorado. The purpose of the association was to inform and educate the public on the activities of their members. In 1886, the Colorado Springs Gazette, which was the official organ of the city council, and the Colorado Springs News, which was based out of the Union Colony and had a similar format, merged to form the

Colorado Springs Gazette-News. When the Gazette-News moved to the new townsite of Colorado Springs in 1899, the paper was renamed the Colorado Springs News. When that paper moved to a new building, the original building was sold to the Methodist Church and became the First Methodist Church. The community had been courting the newspaper in hopes of attracting a newspaper which was more progressive and more in tune with the community, and the Colorado Springs News was seen as a failing paper. The community had already printed two weekly papers, the Colorado Springs Citizen and the Colorado Springs Star, which printed mostly black and white photos. The community had also been courting the concept of an evening newspaper, and had been printing a Sunday paper for years. The Sunday paper
